To the creative team at T3

I respectfully ask that you please examine my work and consider me for employment in the Digital Artist position. My artistic abilities are varied from 3D modeling asset work to 2D animation, graphic design and freelance video editing experience. I graduated from Kansas State University with a Bachelors degree in Fine Arts with a focus in Digital Arts. My ultimate goal is to join a creative team where I can contribute to multiple projects and to actively challenge my artistic abilities on a daily basis.

Through my work on various college projects and freelance assignments, unlike other applicants, I have a much better idea of the stresses of crunch time within the industry. My artistic abilities are highly flexible and can easily be blended in order to suit specific situations. If you need someone to create an eye catching graphic for a website while also understanding the way it will interact with the html and css coding for said website, I'm the one to call on who will provide multiple artistic solutions to choose from. Since graduation I've been actively working to improve my 3D modeling skills by working on multiple complex side projects, as well as training myself in a wide variety of creative software.

At Kansas State and through personal practice, I have gained extensive knowledge and experience utilizing programs such as the entire Adobe Creative Suite and Rhinoceros 5. If hired, I will bring an upbeat hardworking attitude as well as a desire to bring the best quality of work possible.

Thank you for considering me as a possible positive addition to your company. I can best be reached during the day via phone or email. My full Art Portfolio and Demo Reel can be found at my website www.davidmkahler.com. I'm looking forward to hearing from you.

Sincerely

David Kahler
